Education

DY Patil Institute of Technology, Pimpri 2024 – Present
B.E. Computer Engineering — CGPA: 9.54

Projects

Loan Approval Prediction System
End-to-End ML Deployment Project *https://loan-approval-ml-api-1.onrender.com/docs*

- Built a machine learning model using RandomForestClassifier to predict loan approval based on applicant financial and personal data
- Implemented data preprocessing pipeline including missing value imputation, feature scaling, and categorical encoding
- Deployed the trained model as a REST API using FastAPI and hosted it on Render cloud platform
- Stored prediction results and probabilities in a SQLite database for logging and auditing
- Returned prediction probability and top contributing features for model explainability
- Tech: Python, Pandas, Scikit-learn, FastAPI, SQLite, Render

RAG-based AI Assistant (Video to Text)
AI Project

- Converted videos to text using speech recognition
- Implemented retrieval system using embeddings
- Integrated LLM for contextual question answering
- Tech: Python, LangChain, Vector Database

House Price Prediction
Regression Project

- Built regression models to predict house prices
- Performed EDA and feature engineering
- Achieved RMSE score of 1,324,508.13
- Tech: Python, Pandas, Scikit-learn

Certifications

Supervised Machine Learning: Regression and Classification Sep 2025
DeepLearning.AI & Stanford University (Coursera)

Advanced Learning Algorithms Jan 2026
DeepLearning.AI & Stanford University (Coursera)

The Ultimate Job Ready Data Science Course Oct 2025
CodeWithHarry

Technical Skills

Programming: Python
Machine Learning: Classification, Regression, Model Evaluation, Feature Engineering
Data Analysis: EDA, Data Cleaning, Visualization
Libraries: Pandas, NumPy, Scikit-learn, Matplotlib
Tools: Git, Jupyter Notebook
